

How AI Ready Are Your Team?

AI Literacy Framework

The DLI AI Literacy Framework provides a structured system for identifying and developing the skills, knowledge, and behaviors needed to use AI responsibly and effectively.

Built on the UNESCO Digital Capabilities Framework and aligned with the EU AI Act, it helps learning leaders assess current organizational capability, identify gaps, and plan targeted development pathways.

Successful AI adoption crucially depends on informed humans in the loop. This framework ensures your people have the confidence and critical awareness to guide and oversee AI systems safely and ethically.

Foundational AI

Understanding what AI is, how it works, and why it matters

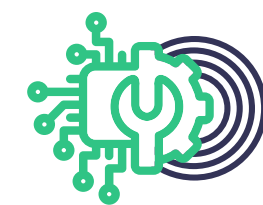

- Understand how AI differs from traditional computing.
- Recognizes where AI influences everyday and professional life.
- Understands key AI type, strengths, and limitations.
- Explains how AI systems use data to identify patterns and make predictions.

Responsible AI

Exploring the ethical, social, and environmental implications of AI

- Identifies and mitigates bias and inequity in AI
- Upholds privacy, security, and compliance standards.
- Evaluates AI outputs for fairness and reliability.
- Applies ethical and transparent AI practices.

Technical AI

Developing practical skills in using AI tools and platforms

- Uses a range of AI tools confidently.
- Writes clear, purposeful prompts for desired outcomes.
- Selects AI tools suited to task and context.
- Integrates AI into workflows and keeps pace with new technologies.

Applied AI

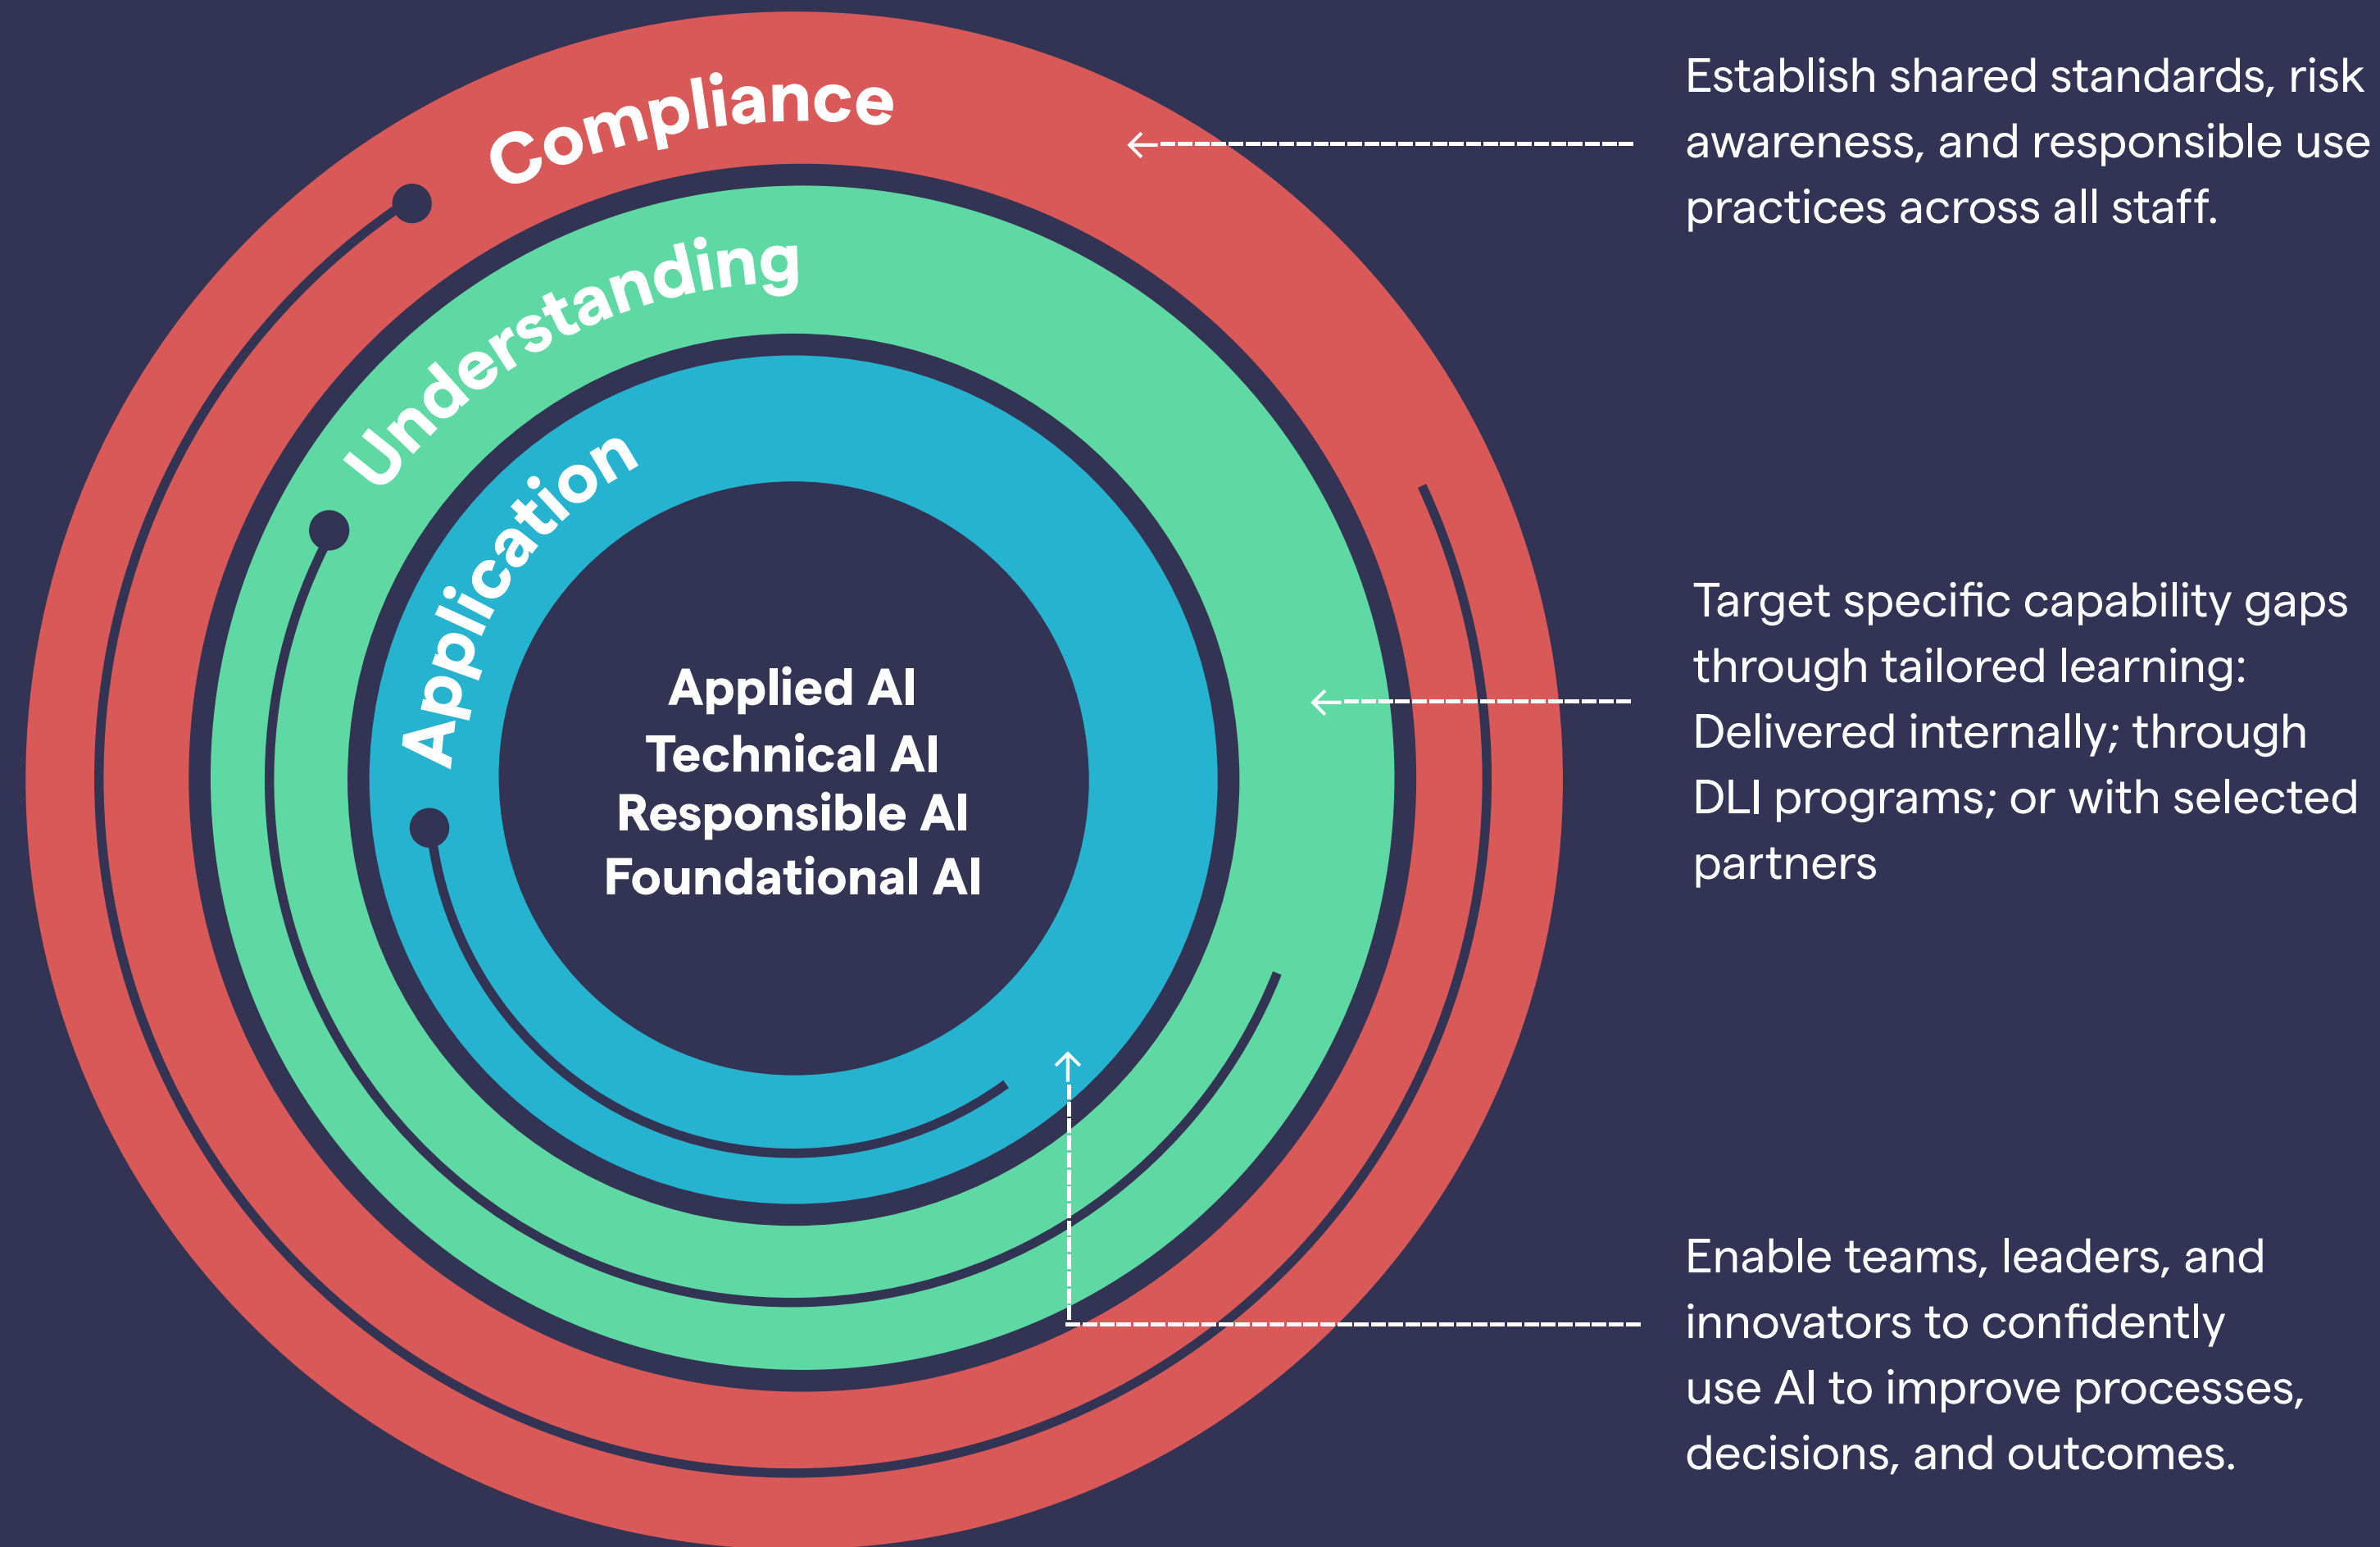

Putting AI understanding into action across contexts

- Uses AI to improve creativity, efficiency, or decision-making.
- Identifies opportunities and potential risks in applying AI to processes.
- Reviews outcomes and impact of AI use.
- Collaborates to design AI-enabled solutions or innovations.

From Compliance to Confidence: The DLI AI Skills Framework

 Level	 Solution	 Audience
Application	Professional Certificate in Applied AI Literacy	AI Champions & Leaders
Understanding	Focused AI Workshops & Masterclasses	AI Users
Compliance	AI Compliance eLearning Course	All Staff

How it Works

We work with your organization to map current AI literacy levels, clarify your regulatory and operational requirements, and define the skills your workforce needs to safely and confidently adopt AI.

Using the framework, we help you build learning pathway that align compliance, capability development, and responsible applied use of AI in real work.

The result is a safe, scalable approach to AI adoption that meets organizational needs today and anticipates future expectations under the EU AI Act and equivalent regional standards.

AI Skills That Work. For Everyone.

Upskill Your Workforce for an AI-Enabled Future
